SUMMARY

Software Engineer specializing in Front-End and Mobile Development with 2+ years of experience building scalable applications using React, React Native, Next.js, and TypeScript. Experienced in delivering production-ready solutions across banking, fintech, and digital platforms, with expertise in API integration, state management, performance optimization, and component-driven development. Adept at collaborating with cross-functional teams in agile environments to create reliable, high-quality user experiences.

WORK EXPERIENCE

PT Bank Saqu Indonesia

Apr 2025 – Now

Mobile Application Developer – Yogyakarta, Indonesia

- Collaborated in the development and maintenance of a production banking application, delivering new features and enhancements for financial and partner-related services.
- Worked across multiple repositories, including mobile applications, shared design systems, and supporting frontend libraries.
- Investigated, debugged, and resolved production issues, improving application stability and performance
- Integrated APIs and managed global application state using Redux to handle complex asynchronous flows and state management.

PT Cipta Sedaya Digital Indonesia (Berijalan)

Jun 2024 – Now

Full Stack Developer – Yogyakarta, Indonesia

- Delivered multiple production-level projects supporting business growth and strategic partnerships.
- Collaborated with cross-functional teams to ensure efficient and high-quality product delivery.
- Developed reusable systems that improved development efficiency and consistency.

Berijalan Bootcamp Technocenter

Feb 2024 – Jun 2024

Front-End Developer Internship – Yogyakarta, Indonesia

- Participated in an intensive program simulating real-world project environments.
- Worked in agile team settings, practicing sprint planning and structured task management.
- Strengthened structured thinking and solution-oriented mindset.

PT Gemilang Media Wisata (Travelxism)

Aug 2023 – Nov 2023

Junior Research Consultant and Technology – Yogyakarta, Indonesia

- Contributed to performance improvement initiatives that reduced system loading time by 75%.
- Contributed to digital platform development and optimization initiatives.
- Collaborated with stakeholders to translate business requirements into functional solutions.

EDUCATION

Universitas Atma Jaya Yogyakarta

Sep 2020 – Jun 2024

Bachelor's Degree in Informatics, 3.64/4.00.

SKILL

- **Programming Languages:** Java, JavaScript, TypeScript, PHP, SQL.
- **Frameworks and Libraries:** React, React Native, Next.js, Expo, Vue.js, Laravel, Redux, Zustand, TanStack Query
- **Tools and Platforms:** Git, Firebase, Figma, Appium, Storybook, Microsoft tools.
- **Soft Skills:** Adaptability, Teamwork, Communication, Problem Solving.

PROJECT

Bank Saqu	Mar 2025 – Now
• Focused on partner integration features, including partner account onboarding, RDN top-up, account binding, and related financial flows. • Contributed to the existing design system repository, ensuring UI consistency and reusable components across the application. • Integrated APIs and managed global application state using Redux Saga to handle complex asynchronous flows and state management.	
ACC BID	Oct 2024 – Mar 2025
• Integrated APIs to handle the data, bidding process, payment, and related financial flows. • Optimized the app's performance by managing state effectively and reducing load times. • Managed global application state using Zustand to handle complex state management.	
Documend	Jul 2024 – Oct 2024
• Integrated APIs to handle file uploads, downloads, and permission management, ensuring secure and efficient data handling across the platform. • Designed and built complex, reusable component-based architecture, enabling efficient scalability and maintenance. • Implemented responsive web design by paying attention to user devices such as iOS or Android to maintain the consistency of the user interface.	
Geoservicemap	Jul 2024 – Oct 2024
• Integrated OpenStreetMap and Googlemap, creating a reusable map component that supports various map-related features. • Implemented API integrations for real-time map visualization and location data management. • Developed CMS functionalities and integrated backend services to streamline content management processes.	
Travelxism	Feb 2024 – Mar 2024
• Designed user interface and user experience for website and mobile using Design Thinking Method. • Implemented Front-End, SEO, Responsive Web design, and integrated the APIs for the feature. • Focused on developing an e-tourism feature, specifically for booking tours.
